

How to Live a Successful Life, by a Twenty-Year-Old Student

This book contains information from a person who has experienced all of the above. My father is one who groomed me well for life, as well as the rest of my family. In this book, you will find that the information provided helps with many aspects in life. Since I am only twenty years old, I may not have all the answers or all the experience that many of you might have, but things in my life may have some of the same background as you. This book is to help all those in need, and when you feel down and helpless, there is always a better way of looking at life and true brighter things in life other than money and luxurious living. All I hope is that this book helps with those looking for what they are reading.
