

English Accent and Diction

Cromosys Publications English Accent and Diction book is an optimal quality guide to the advanced learners of English. It helps you gain real knowledge of English Accent, Voice Modulation, and Diction Science. It is an unmatched unique book of its kind that guarantees your improvement on phonology. We are the leading eBook publisher of languages and technology. Our research and education center working for last fifteen years has made tremendous effort to simplify the learning accent, and so, I assure you that this book will walk you through in the simplest way in your entire course of learning. The lessons and study materials uniquely designed are based on our fifteen years of research in linguistic field. The lessons are magnificently powerful to bring you into the light of diction science. Since English is accepted as a global language, the people around the world have been sharpening their knowledge to be good in it. Sometimes, only working knowledge of it doesn't work, and you feel that there is a lot more to explore. The accurate and profound knowledge of this language, which was considered to be existing only in England and America in the past, has influenced millions of minds today, therefore I conceived the idea of making this book a guideline for those who want to be perfect in English Pronunciation. Niranjana Jha, the author of this and twenty other eBooks available online, is the founder of Cromosys Corporation. His dedication in technological and linguistic research is significantly known to the millions of people around the world. This book is the creation of his avowed determination to make the learning of accent and diction easy to the people. The significance of this book is that it is dynamic, systemic and blissful with abundance of pure and perfect set of rules that took a decade of time in preparation. One alone, being immaturely

suggested, spend ages in reading literature, watching movies and listening to the audio which help them to imitate a little but not learn what in actual sense it is, and their never-ending process of Picasso Adventure collects some scattered information which is unworthy to phonological approach. And the aspirants get lost in wilderness. This fact may surprise you that almost ninety percent people of the world don't know how to speak proper English. And so, even in this 21st century, a large number of people are away from the benefits of communicating with native speakers. Whether you want to travel abroad or plunge deep into your research, your poor accent or bad pronunciation damages your reputation so much that neither a native speaker can understand you nor you can understand him. You may be very good in writing, but that is not enough today. With the growth of several call centers, there is a need of talented people to express clearly in the field of communication. The telecommunication industry has greatly inspired several people to have a neutral accent so that the communication is more effective. This is a major advantage that will help you get a job.
