

Tissue-Specific Vascular Endothelial Signals and Vector Targeting, Part B, Volume 69 (Advances in Genetics)

The field of genetics is rapidly evolving, and new medical breakthroughs are occurring as a result of advances in knowledge gained from genetics research. This serial continually publishes important reviews of the broadest interest to geneticists and their colleagues in affiliated disciplines. Includes important reviews of the broadest interest to geneticists and their colleagues in affiliated disciplines, providing researchers an overview and synthesis of the latest findings in the area. Presents up-to-date research from leaders in the field
