

Measuring Penny

Lisa has an important homework assignment--to measure something in several different ways. She has to use standard units like inches and nonstandard units like paper clips to find out height, width, length, weight, volume, temperature, and time. Lisa decides to measure her dog, Penny, and finds out ... Pennys nose = 1 inch long Pennys tail = 1 dog biscuit long Pennys paw print = 3 centimeters wide ... and thats only the beginning! Lisa learns a lot about her dog and about measuring, and even has fun doing it. This clear and engaging concept book, delivered with a sense of humor, is certain to win over the most reluctant mathematician.
