

Human Endeavor : Essence & Mission: A Call for Global Awakening

Have you ever wondered where our society is heading? What is the future of humanity? Are we heading in the right direction or are we heading on a course for certain destruction? When you listen to all the noise around you today you may get discouraged and lose track of how we as a human race and society can build a better future. Many great thinkers from Socrates to Gandhi have pondered these points and have tried to look into our future for answers. In this book we look at how science and religion from many sources contribute to our identities as humans and how these positive creations of humanity can guide us into a better future for generations to come. Let this book not be an answer but a source of inspiration and introspection for ideas, thoughts, and discussion of how we as a global society can rediscover ourselves and regain a vision for a brighter future world.
