

## 425 Intermediate Chinese Characters (Comprehensive Approach to Learning Chinese Language)

The goal of 425 Intermediate Chinese Characters is an introduction to writing Chinese characters of intermediate difficulty. My second book, 425 Easy Chinese Characters, is an introduction to writing Chinese characters with the simplest strokes. The first book, Hanzi and the Kangxi Radicals cover the entire set of the 214 Radicals that are compiled to create all the Chinese characters. This book, my third book, introduces characters of increasing complexity using all the strokes from Book 2 and adding strokes that are common yet not too complex. There are 425 pages of practice drills introducing a new unique method of writing practice. Included in this book are chapters on pronunciation, stroke order and tone.
