

The Analytical Speller: Containing Lists of the Most Useful Words in the English Language, Progressively Arranged and Grouped According to Their ... Rules for Capitals, Etc (Classic Reprint)

Excerpt from The Analytical Speller: Containing Lists of the Most Useful Words in the English Language, Progressively Arranged and Grouped According to Their Meaning; With Abbreviations, Rules for Capitals, Etc This book is an attempt to substitute intelligent, thoughtful work for the unmeaning drill of the old-fashioned Spelling-books. The spelling lessons, as here given, consist of words related to each other in meaning, and so arranged that even where they are not understood by the children their meaning may be easily learned. The exercises are progressive, beginning with simple thoughts and words, and passing on to more difficult ones, - thus developing the pupils use of language as his mental powers and ideas are developed. The spelling lesson is an exercise upon which the pupil drills for many years. Whatever it contains, therefore, becomes a fixture in the mind, - it is forever remembered. Even the unmeaning columns of the olden time were thus retained. Who that used the old Websters spelling-book has forgotten that Sha-dy came next after Ba-ker in the column? Now, this being so, is it not worth the while to give the matter thus remembered as great a value as possible? Is there not a great gain effected when the words are made to have a meaning to the child? when the word to be spelled is associated with an idea of which he is, or must become, the master? Is it not useful to awaken in this exercise as many as possible of his faculties? Is it not a law of the mind that every faculty employed about the acquisition of a thought is a separate link for holding that thought? Is it not true that a word remembered by its form alone is more imperfectly remembered than one that, in addition to its form, has the association with a living idea, to assist the memory?
