

Evolving with the Universe

Why are we human beings still living according to materialistic principles? What is keeping us from evolving into a more advanced, harmonized, and peaceful civilization? In *Evolving with the Universe*, Masami Saionji gives us pause to reflect on our true human nature, the relationship between ourselves and others, and our daily way of living and thinking. Her truth-filled messages take us on a journey deep within, to a place where we transform our thought-habits and reclaim our responsibility as citizens of Earth. In doing so, each of us begins to lead humanity forward on its evolutionary path, toward a higher-dimensional consciousness and a world of lasting peace and stability.
